

Souhail Smiri

Software developer

souhail.smiriaa@gmail.com | +216 23050898 | Manouba, Tunisia

GITHUB | LINKEDIN

EDUCATION

HIGHER INSTITUTE OF ARTS AND MULTIMEDIA

INTERNET OF THINGS BACHELOR'S DEGREE

September 2021 - June 2024

Manouba, Tunisia

LYCE IBN ABI DHIAF MANOUBA

COMPUTER SCIENCE HIGH SCHOOL DIPLOMA

September 2017 - June 2021

Manouba, Tunisia

EXPERIENCE

QUEBEC CENTER | IOT INTERN

Manouba, Tunisia | February 2024 – May 2024

- Designed and developed a Raspberry Pi Cluster, making use of Kubernetes for container orchestration.
- Implemented networking and load balancing solutions.

NEXTERS SOLUTIONS | FULL-STACK DEVELOPER INTERN

Tunis, Tunisia | June 2023 – August 2023

- Assisted in the development of a Customer Relationship Management (CRM) system, encompassing both front-end and back-end components, using the MERN stack.
- Implemented RESTful APIs, enhancing the system's ability to retrieve and manipulate customer information

SKILLS

PROGRAMMING LANGUAGES

C++, Java, Python, C#

LIBRARIES/Frameworks

HTML, JavaScript, React, NextJs, Tailwind CSS, Express, NodeJs

TOOLS / PLATFORMS

Git, VS Code, Unity, Android Studio, Photoshop, Linux, Kubernetes, Node-Red, Arduino, RaspberryPi, ESP32

DATABASES

MongoDB, SQL

PROJECTS / OPEN-SOURCE

CLUSTER RASPBERRY PI

Linux , Kubernetes , Raspberry Pi , Networking , Python

Designed and developed a Raspberry Pi Cluster, Making use of Kubernetes for container orchestration.

MYWEATHER | [LINK](#)

Java , Android Studio

Created "MyWeather," an Android weather app with a sleek design and open-sourced it on GitHub for community collaboration

EDUCATECK | [LINK](#)

Java , Android Studio , IOT , Arduino , Raspberry Pi

Collaborated on "Educateck," an IoT-based smart high school system with environmental monitoring and a parking management solution, integrating Firebase for secure data sharing.

ALFAYN | [LINK](#)

Javascript , NextJs , React , Liveblocks , Clerk , Tailwind CSS

Created an improved Google Docs that manages millions of collaborators in real-time.

SECURECHAT

Python, Socket Programming, Cryptography

Development of "SecureChat," a real-time secure chat application. Implemented end-to-end encryption to ensure the confidentiality of messages exchanged between users.

Creation of "CyberLab," a home lab environment for cybersecurity, using Kali Linux and various security tools. Designed to test and practice techniques for protecting against cyberattacks in real-world scenarios.
